

506 GO terms clustered by 'binary_cut'

basement morphogenesis chromatin positive
assembly complex membrane negative
regulation organization

import
establishment cell secretion cellular vesicle ion
localization regulation transport

negative rna
catabolic positive activity dna biosynthetic
regulation process metabolic

receptor dna cell
pathway positive negative checkpoint
regulation signaling response

mesenchymal nervous growth
cell regulation neuron system involved
development differentiation

cell calciumdependent negative cellsubstrate
adhesion regulation cellmatrix mediated integrin

frequency cilium ciliary beat metal
homeostasis ion regulation motility involved

regulation proliferation negative mast activation
polarity establishment cell lymphocyte

rho guanylnucleotide exchange molecular function
regulation activity negative catalytic phospholipase
