

554 GO terms clustered by 'binary_cut'

signal dna
response growth receptor positive transduction
signaling regulation pathway

biosynthetic polymerase
transcription metabolic negative positive rna
regulation process catabolic

positive negative process cardiac
morphogenesis differentiation muscle
regulation development cell

establishment nucleus ion calcium membrane
localization positive migration
regulation transport

homeostatic cell destabilization glucose carbohydrate
homeostasis ion cellular cation metal

nicotine fatty disaccharide sucrose cellular jasmonic
response triiodothyronine thyroglobulin acid

chromosome positive mitotic process phase
regulation cycle cell transition separation

granule subunit
regulation filament actin complex spindle bundle
organization assembly

lymphocyte activation
negative granulosa adhesion positive cholangiocyte
regulation proliferation cell
