

1515 GO terms clustered by 'binary_cut'

transmembrane secretion ion calcium
localization vesicle cell membrane
transport regulation

junction microtubule disassembly
regulation maintenance nucleosome dna complex
organization assembly

cellular signal
negative pathway receptor positive cell
regulation response signaling

rna negative
biosynthetic catabolic positive mrna transcription
PROCESS regulation metabolic

formation positive muscle
differentiation involved negative
development morphogenesis
regulation cell

transition metal
cellular cation postsynaptic membrane iron
homeostasis regulation ion
