Revigo TreeMap

phosphatidylinositol-mediated signaling	release of sequestered calcium ion into cytosol		regulation of modification of postsynaptic actin cytoskeleton		canonical glycolysis		hair follicle maturation
positive regulation of <b>phos</b> dendritic spine development	intracellular signal sphatidylinositol-mediated sigr	naling exocytosis		positive regulation of cilium assembly	canonical glycolysis phosphatidylinositol metabolic process		neuron projection development
modulation of chemical synaptic transmission	positive regulation of growth hormone secretion	positive regulation of phosphatidylinositol 3–kinase/protein kinase B signal transduction		G protein–coupled receptor signaling pathway	neuron apoptotic process	positive regulation of GTPase activity	actin filament organization
